It is important to note that there are two different Fixtec Nut designs that can be used on the 2785-20 M18 FUEL Grinder. Each Fixtec Nut utilizes a spanner wrench that is unique to the nut.

Fixtec Nut 05-59-0015 (1) must be used with Spanner Wrench 49-96-0002 (33). Fixtec Nut 05-59-0016 (34) must be used with Spanner Wrench 49-96-0004 (35).

Use this diagram to determine the nut and wrench design and order service parts accordingly.

When servicing, remove 90-95% of the existing grease prior to installing Type 'Y'. Original grease may be similar in color but not compatible with 'Y'. Clean gear assemblies with a clean, dry cloth.

LUBRICATION
Type 'Y' Grease, No. 49-08-5275 (14 oz. tub)
Apply a liberal amount of grease, approximately 5 grams/.17 oz. to the Bevel Gear (7e) and Bevel Pinion (13). Be sure that all gear teeth are coated.

Place approximately 25 grams/.88 oz. of grease in the gear cavity of gearcase assembly (11).
