SEE BACK OF BULLETIN FOR
SPECIAL NOTES AND LUBRICATIONIMPORTANT: SEE NOTES FOR ITEMS
124 and 141 BEFORE DISASSEMBLYMILWAUKEE ELECTRIC TOOL CORPORATION
13135 W. Lisbon Road, Brookfield, WI 53005
Drwg. 1

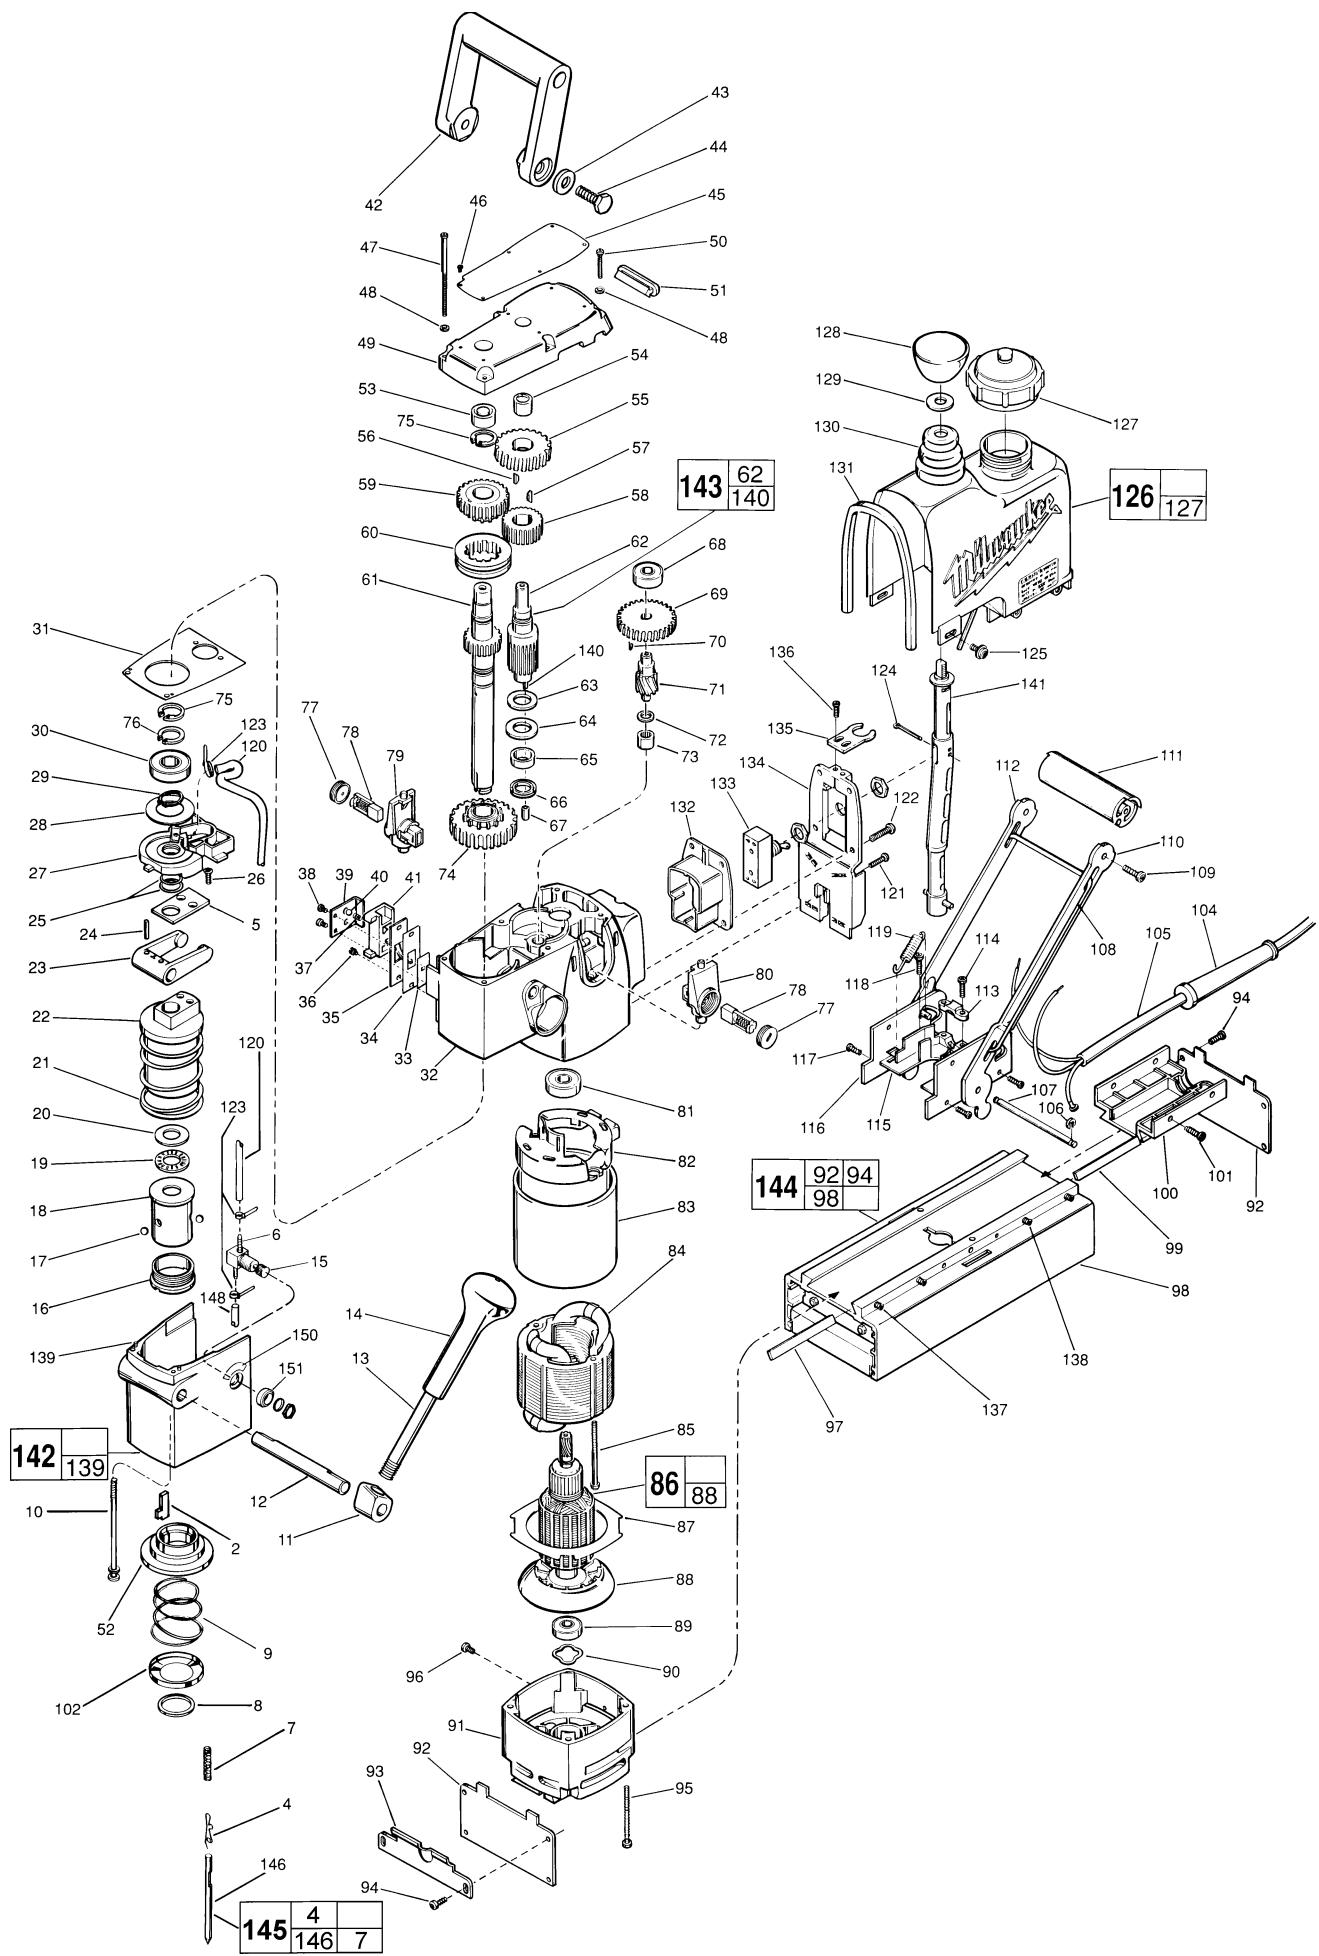

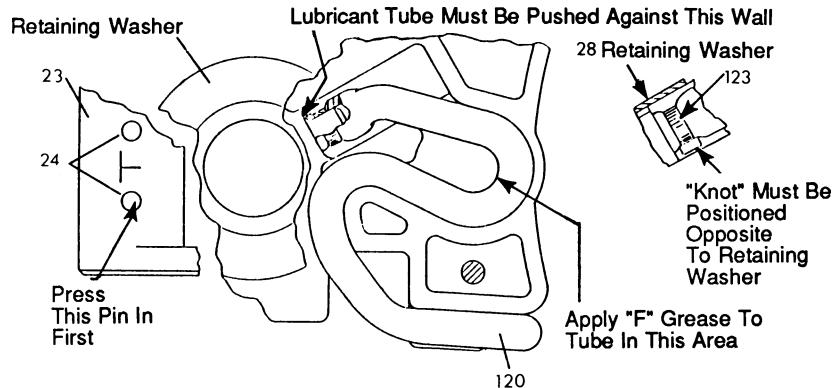

FIG. NOTE

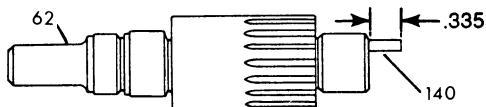

- 23 "T" marking on feed cam must face up.
 24 Groove pins must be pressed in order shown.
 120 One end of lubricant tube must be pushed against the wall of pump housing, as shown.
 123 Set tie gun tension at its' maximum. "Knot" must be positioned opposite to retaining washer as shown.

FIG. LUBRICATION

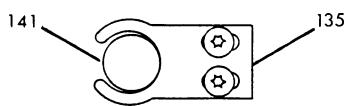

- 120 Apply a thin coating of type "F" grease, No. 49-08-4165 to areas shown on lubrication tube.

**FIG. NOTE**

- 62, 140 Pin to be pressed into shaft to dimension shown, with no burrs or peening allowed on head of pin after assembly.

**FIG. NOTE**

- 135 Bracket must be positioned against plunger as shown before screws are tightened.

**FIG. NOTE**

- 10,95, Apply Herno #423 blue sealant. Keep grease away from threaded holes. **IMPORTANT: Check Torque!**
 137
 12 Flats must face upward as illustrated on parts drawing.
 16 Tighten securely with tool number 61-20-0050.
 Note: Left hand thread. 90-125 in./lbs.
 33,34, One corner is rounded on all three parts. They must all face with the rounded corners closest toward the "H" engraved into the housing at the top.
 66 Rubber seal to face inside of casting.
 68 Open end to face gear.
 89 Seal to face fan.
 120 Push one end of lubricant tube 3/8" to 1/2" onto brass tube of lubricant container.
 133 Mount switch with slot of switch facing towards end cap (Item 91).
 124, 141 Before removing cotter pin, make note of which slot, in switch plunger, the pin has been placed.
 Reassemble accordingly. Bend pin tabs around plunger.

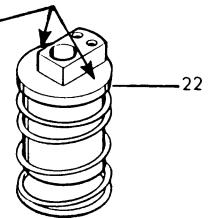

SPECIAL NOTES:

- Check function of switch / base interlock system.
- After servicing unit, run a tank full of Hawg Wash through to check for proper fluid flow. It should empty in 4-1/2 minutes or less with fluid control valve completely open.

FIG. LUBRICATION

- 22 Coat both areas of feed collar as shown, with type "N" grease, No. 49-08-4230.

Coat Both Sides With "N" Grease

**FIG. LUBRICATION**

- 19 "Bow" should face towards end of spindle.
 19, 20 Coat both sides of these items with type "N" grease, No. 49-08-4230, before placing in feed collar.
 27 Apply a small amount of type "F" grease, No. 49-08-4165, to both inner grooves before inserting O-rings. Keep grease away from cross hole.
 32 Apply 3 oz. of type "J" grease, No. 49-08-4220. 1 oz. into each gear cavity.
 22, 61 After sliding pump housing onto spindle, coat entire spindle and inside of feed collar with type "F" grease No. 49-08-4165 before the feed housing and it's inside mechanism is assembled. Keep grease out of key slot at end of spindle after assembly.
 61 Apply a thin coat of type "N" grease, No. 49-08-4230, to outside diameters of spindle where items number 59 and 74 fit before assembling.
 63,64 Coat both these items with type "J" grease before assembly.
 140 Coat pin lightly with type "J" grease, No. 49-08-4220, before assembly of item 67.
 49 Apply 1 oz. of type "J" grease, No. 49-08-4220 onto inside of gear case cover.
